

Daniil Fedorov

C++ Engine Programmer
Moscow, Russia adiventes@gmail.com +7 920 839-93-12

Summary

C++ programmer experienced in proprietary game engines, animation-based locomotion, inverse kinematics, and AI systems. Background in engine-core debugging, testing tools, and high-load C++ backend development; also built and led development of a Unity WebGL engine.

Technical Skills

C++ & engine systems: C++, CMake, ImGui, OpenGL; proprietary game engines

Animation & AI: Locomotion, inverse kinematics, decision-making, pathfinding, obstacle avoidance

Testing & architecture: Integration tests, Python unit tests, NUnit, TDD, DDD, ECS, MVVM

Additional technologies: C#, Unity, UniTask, UniRx, DOTween, Zenject; SQL, Git, Jenkins, GitHub Actions

Experience

Conscript, Compulsory Military Service — Nov 2025 – Nov 2026

Engine Programmer, Eagle Dynamics – Moscow, Russia — Apr 2024 – Nov 2025

- Maintained animation-based NPC locomotion in a proprietary C++ simulator engine.
- Implemented inverse kinematics (IK) algorithms and AI decision-making, pathfinding, and obstacle avoidance.
- Created a dedicated AI testing submodule and debugging tools for development and validation.

Co-Founder & Lead Engine Programmer, UwU Novels – Moscow, Russia — Apr 2024 – July 2025

- Built a Unity WebGL visual novel engine using MVVM, UniTask, UniRx, and DOTween; led a team of 3-5 developers.
- Integrated Yandex.Cloud S3, OAuth, and serverless services with React.js; set up Jenkins and GitHub Actions CI/CD.
- Co-founded the platform, raised $19K+ in funding, and reached 500+ registered users.

Junior Gameplay Programmer, Saber Interactive – Remote — Apr 2023 – Apr 2024

- Fixed a critical animation bug deep in the C++ engine core of a first-person title.
- Implemented animation-driven locomotion, parkour, and interactive props using an in-house engine and proprietary scripting language.
- Wrote integration tests for complex animation/gameplay logic and collaborated with QA and animators.

C++ Backend Programmer, Yandex – Moscow, Russia — Nov 2021 – Apr 2022

- Maintained and extended a high-load C++ backend for the ads engine.
- Wrote Python unit tests and SQL queries to validate results and data integrity; configured and monitored A/B tests.

Education

Higher School of Economics, MEng in System and Software Engineering — Sept 2024 – June 2027

Higher School of Economics, Bachelor in Software Engineering — Sept 2020 – July 2024

Languages

Languages: English (B2); Russian (native); Belarusian (native)

Certifications

TOEFL iBT 91/120 (Mar 2024)
