

Daniil Fedorov

Unity Gameplay Programmer

Moscow, Russia adiventes@gmail.com +7 920 839-93-12

Summary

Game programmer fluent in C# and C++, with experience in Unity WebGL, animation-driven gameplay, locomotion, and AI. Co-founded UwU Novels, raised $19K+ in funding, and built its Unity visual novel engine, growing the platform to 500+ registered users.

Technical Skills

Unity & C#: Unity, WebGL, C#, Zenject, UniTask, UniRx, DOTween, NUnit

Gameplay: Locomotion, animation, inverse kinematics, AI, pathfinding, obstacle avoidance

Architecture & tools: MVVM, ECS, DDD, TDD; Git, GitHub, Jenkins, GitHub Actions, Jira, Figma

Additional technologies: C++, ImGui, OpenGL, CMake; Yandex.Cloud, S3, OAuth, serverless

Experience

Conscript, Compulsory Military Service — Nov 2025 – Nov 2026

Engine Programmer, Eagle Dynamics – Moscow, Russia — Apr 2024 – Nov 2025

- Maintained animation-based NPC locomotion in a proprietary C++ simulator engine.
- Implemented inverse kinematics (IK), AI decision-making, pathfinding, and obstacle avoidance.
- Created an AI testing submodule and debugging tools for development and validation.

Co-Founder & Lead Engine Programmer, UwU Novels – Moscow, Russia — Apr 2024 – July 2025

- Led 3-5 developers building a no-code visual novel platform; built its Unity WebGL engine with MVVM, UniTask, UniRx, and DOTween.
- Integrated Yandex.Cloud S3, OAuth, and serverless services with a React.js frontend.
- Set up Jenkins builds and GitHub Actions for cloud microservices.
- Raised $19K+ in funding and reached 500+ registered users; hosted a game jam with 100 participants and 30 published visual novels.

Junior Gameplay Programmer, Saber Interactive – Remote — Apr 2023 – Apr 2024

- Implemented animation-driven gameplay and locomotion for a first-person title using an in-house engine and proprietary scripting language.
- Developed parkour and interactive props, including doors, buttons, and ledges; collaborated with QA and animators to refine motion flow.
- Fixed a critical animation bug in the C++ engine core and wrote gameplay/animation integration tests.

C++ Backend Programmer, Yandex – Moscow, Russia — Nov 2021 – Apr 2022

- Maintained and extended a high-load C++ ads backend; wrote Python tests and SQL validation queries, and configured and monitored A/B tests.

Education

Higher School of Economics, MEng in System and Software Engineering — Sept 2024 – June 2027

Higher School of Economics, Bachelor in Software Engineering — Sept 2020 – July 2024

Languages

Languages: English (B2); Russian (native); Belarusian (native)

Certifications

TOEFL iBT 91/120 (Mar 2024)
